                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | WK %     #### French endorse defence plan

13

The French cabinet endorses a defence procurement programme for 1997-2002, designed to produce the same amount of weaponry at less cost. French forces are to be fully professionalised. The programme, costing about FFr86bn (£11bn), will be closely watched by France's partners. particularly Germany, for any cuts in collaborative arms projects. For instance, French participation in the pan-European Future Large Aircraft troop transport project remains vague.

#### **S Africa telecoms push**

South Africa endeavours to launch the developing world into the global telecommunications village, with the Information Society and Development Conference which it is hosting near Johannesburg (to May 15). The conference foliows an appeal by Thabo Mbeki, the deputy president, for better telecommunications among the half of bumanity that has never made a telephone call - there are more telephooes in Manhattan than in sub-Sabaran Africa. Jacques Santer, the EU president, will be among sentatives from at least 40 countries.

#### China steps up foreign trips

Zhu Rongji, the Chinese vice premier. begins an official tour of Indonesia, Thailand and Malaysia (to May 26). In Jakarta, he will attend a symposium on regional economic developments. Mr Zhu's tour is part of a flurry of overseas visits by China'a leaders, including the present extensive tour of Africa by President Jiang Zemin (to May )4).

#### Fall in Japan trade surplus

Japan publishes its

payments statistics

for the fiscal year

1995-96. These

should show the

sharpest annual fall in Japan's

14

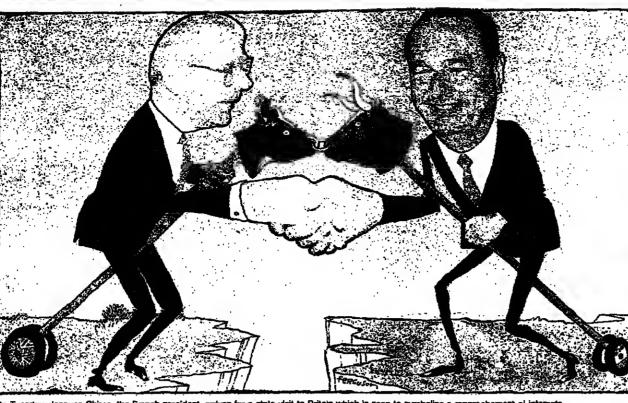

balance of

buge and politically troublesome trade surplus for six years because of an imports surge. On Thursday, the annual ranking of top taxpayers is presented - usually led by entertainers, sports stars and the odd politician. Interest will be mainly in those strangely missing from the list. Among those hit for the under-paying of taxes last year were TV producers and members of the once-unimpeachable state bureaucracy.

#### TUESDAY

Chirac on state visit to UK Jacques Chirac, the French president, arrives in Britain for a four-day state visit bosted by the Queen. He will hold talks with John Major, the prime minister, and opposition party leaders, address the houses of parliament, and discuss economic and monetary union issues at the Bank of England. The visit is seen as symbolising a new-found warmth in relations and rapprochement of interests -

On Tuesday, Jacques Chirac, the French president, arrives for a state visit to Britain which is seen to symbolise a rapprochement of interests

#### particularly on defence and some aspects of European policy. However, he has sbown a strong commitment to monetary union. And France was the first country to impose the ban on British beef.

#### Non-aligned in Cartagena At least 20 foreign ministers from

members of the Non-Aligned Movement meet in the Colombian city of Cartagena to discuss candidates for membership and to push ahead with the agenda drawn up when Colomhia took over the presidency of the movement. Some countries have questioned whether President Ernesto Samper - under investigation for drug funding of his 1994 election campaign - is an appropriate leader (to May 16).

#### **Privatisation in Prague**

Privatisation - how to do it and its impact on societies - is the topic of a conference In Prague that draws together speakers from most countries in central and eastern Europe, including rump Yugoslavia, Bosnia-Hercegovina and Russia. The conference will focus on banking and capital markets, energy, beavy industry and telecommunications. Speakers at the conference, which is sponsored by the Czech privatisation ministry, include Haris Šilajdžić, the former prime minister of Bosnia-Hercegovina, and Lajos Bokros, the former Hungarian finance minister.

#### Germany rules on asylum

Germany's federal constitutional court decides on a challenge lodged against the 1993 asylum laws. Asylum-seekers whose claims have been turned down are complaining about the "third-state ruling" under which Germany refuses to grant asylum to people who arrive in the country via a state considered safe from political oppression.

#### Tennis British clay court championships, Cardiff (to May 19).

15

**Public holidays** Georgia, Liberia.

## WEDNESDAY

**Tories threatened on CAP** In an attempt to step up efforts to exploit the Tory party split over Europe in Britain's House of Commons, Labour MPs will table a technical motion for a vote on the common agricultural policy. The government bopes to avoid trouble by making the result non-binding. However, it could face embarrassment if widespread abstention by Tory Eurosceptics were to enable Labour to win.

#### Czech election campaign

Campaigning officially begins for a general election in the Czech Republic, for which voting takes place on May 3) and June 1. Although it will be the third time Czechs have voted since the overthrow of communism in 1999, it will be the first election since the split with Slovakia three years ago. Opinion polls suggest that because of the success of his centre-right reform programme, Václav Klaus, the prime minister, will be returned for a second four-year term. If so, the Czechs will be among the few countries in post-communist eastern Europe not to oust their reformers.

#### US to punish China on piracy A serious trade war between the US and China is poised to break out with President Bill Clinton expected to propose

Statistics to be released this week

a sanctions list, punishing Beijing for its failure to enforce its laws prohibiting piracy of videos, compact discs, softwear and other intellectual property. The list is expected to identify products whose annual trade value is up to \$3bn (£1.9bn). However, the list will be whittled down. The administration is expected to target textiles, clothes, footwear and electronics, and particularly products manufactured in Guangdong province where most of the production of pirated goods takes place.

#### Smoking ban in Beijing

with Chinese authorities increasingly aware of healthcare costs. Individuals violating the ban will be fined Yn10 (SOp) and organsations Yn5,000, Smoking in public places has already been banned in other major cities in China, which is the world's biggest tobacco producer and consumer

#### Venezuela to woo bankers

Venezuela's finance minister, Luis Raul Matos Azocar, travels to New York to talk to investors. Venezuela recently applied austerity measures to reduce its 6.1 per cent budget deficit and reached a preliminary standby agreement with the International Monetary Fund. Mr Matos Azocar will seek to restructure an estimated \$7bn (£4.6bn) of the country's \$32bn public debt. He must present a viable 1997 budget to Congress within a

month

#### Judo Redwood v Brittan on Europe

John Redwood, the Eurosceptic Tory MP who challenged the leadership of John Major, the British prime minister, debates with Sir Leon Brittan, the EU trade commissioner, the questiou "is Britain's national identity threatened by further European integration?" The debate is sponsored by the Financial Times and takes place at Warwick University.

#### Horse racing

Dante Stakes, York racecourse, England.

FT Survey The New Severn Bridge.

**Public holidays** Paraguay, Spain (Madrid).

THURSDAY

#### **Elections in Gibraltar**

Elections take place in Gibraltar, the tiny Britisb crown colony at the tip of Spain and the object of a long-running dispute tween London and Madrid. Joe Bossano. the leader of the Gibraltar Socialist Labour Party (GSLP) and chief minister since 1988, seeks a third successive term. He opposes any Spanisb-Britisb deal that would compromise the independent status be is attempting to forge for the Rock. The Gibraltar Social Democrat party, neck and neck with the GSLP in opinion polls. wants better relations with Spain - which alleges that under Mr Bossano Gibraltar has become a drug-smuggling and money-laundering centre.

#### **Dominican Republic votes**

A new president is being elected in the Dominican Republic to succeed Joaquin Balaguer, an octogenarian who has served six times. He is retiring after only two years of his four-year term following claims that his election was marred by mismanagement and corruption. The frontrunners are Francisco Pena Gomez, ol the social democrat Revolotionary party, and Leooel Fernandez, of the Liberation party, which was marxist but is now conservative. Jacinto Peynado, the candidate for Mr Balaguer's conservative Reformist party, is expected to be third.

#### Greenwich millennium hurdle

Britain's Millennium Commission considers the business plan for the millennium exhibition in Greenwich in 2000. Although the project has been granted up to £200m of lottery funds, Sir Peter Levene - who is leading negotiations with the private sector - has been struggling to find sponsors to match this. He will have to show there is enough com mercial interest to warrant pursuing the flagship project rather than falling back on plans for regional celebrations.

# YOUR BIGGEST GLOBAL RISK MAY BE USING AN INSURER WITHOUT THE FINANCIAL STRENGTH AND INTEGRATED GLOBAL CAPABILITIES OF AIG.

FINANCIAL TIMES MONDAY MAY 13 1996

Quite simply, if you're a global company, you face a variety of changing financial exposures. You need a financial partner that not only understands complex risks, but can also provide a variety of insurance and financial solutions. Not to mention the size, strength and stability to be there for the long term. Enter AIG – with unparalleled global capabilities backed by extraordinary financial strength.

What AIG offers is expertise not only in insurance, but also in managing and integrating total marketplace risk. By combining traditional insurance with sophisticated financial solutions, we create unique consolidated risk financing programs, including large-limit multiyear packages with flexible terms and limits.

And who better to meet your local needs than someone who's there? With offices in 130 countries and jurisdictions throughout the world, we have an unmatched knowledge of local conditions and regulations. These resources deepen our own on-the-ground financial structuring, engineering and claims capabilities.

To underscore that we can handle all your needs, we've even created a specialized division, AIG Global Risk. Only AIG could bring together this seamless unit to provide integrated risk management solutions. Access is just a call away.

And we back it all up with an impeccable balance sheet, Triple-A ratings, capital funds of nearly \$20 billion, and net loss reserves approaching \$20 billion.

So we'll be there whenever and wherever you need us. Because no one else can.

For more information please call Tobey J. Russ at (212) 770-7898.

WORLD LEADERS IN INSURANCE AND FINANCIAL SERVICES

## MANAGEMENT

ou are a world champion sprinter and you want to stay at the top for the foreseeahle future. But the rivals snapping at your heels are employing ever more skilful techniques to narrow the gap: how do you stay ahead?

10

This is the sort of question faced by a handful of companies, global leaders in their fields, as they try to remain number one at a time of increasing international competition, changing technologies and spiralling demands for better service and more enhanced products from consumers and industrial customers.

Three such companies, in disparate areas but facing related dilemmas, are Otis, part of the US's United Technologies group and the world's biggest elevator husiness; the privately owned Danish Lego group, the targest worldwide maker of construction toys; and John Crane, part of Britain's TI engioeering company and the global leader in supplying complex mechanical seals used in pumps and similar products with a vast range of applications.

All three companies are mindful of how a range of other husinesses in the past which include IBM in computers, Perkin-Elmer in chip fahrication equipment and the British company Plessey in machine tool controls - huilt up a commanding lead over rivals in their field only to see it whittled away by events apparently beyond their control.

"A lot of world leaders are realising they've got to re-position themselves, not hecause they're in criais but hecause of wider changes," says Dooald Marchand, professor of information management and strategy at the International Institute for Management Development (IMD) in Lausanne, Switzerland, Marchand is involved in advising about 30 such companies, including Otis, oo what their responses should be.

A common thread is that Otis, Lego and John Crane are each in fairly mature industries, with few signs of large spurts in demand for their products in their main markets in Europe and the US.

Each in the past year bas instituted a range of programmes aimed at speeding up their responses to market pressures. In particular trying to capitalise on increased demand from regions with fast growing economies such as East Asia.

A common theme is their determination to capitalise on advances in information technology, either through the ahility to hring out new products or add to their efforts to provide a better service. Additionally, each of the three is trying, in different ways, to bone the "think global, act local" maxim of many big companies with international businesses.

The specific challenges facing the three companies, however, are different. Otis, beadquartered in Connecticut, but with its \$5hn (£3.2hn) of annual revenues split between some 220 operating companies around the world each with a fair degree of autonomy, is experiencing flagging demand for its main products of lifts and escalators in the developed world, a hy-product of the geogral slowdown in construction in the main developed countries.

It is therefore switching its resources to concentrate more on the "service" end of its business - supplying spares and updating existing equipment - as well as putting more effort into marketing and sales in regions undergoing construction booms such as southern China and the Philippines. Lego, maker of the ublquitous plastic bricks and miniature figures, with sales thought to he about \$1.2hn, needs to Peter Marsh reports on what three industry leaders are doing to remain at the top amid increasing competition

# One step ahead of the pack

Chicago-based John Crane, with annual sales of about \$800m, has a style of operating some way between Otis and Lego - less centralised than Lego but more so than Otis.

With its beavily customised product range - its mechanical seals sell in approximately 750,000 different variations and fetch anything between \$1 and \$1m - Crane's challenge is to try to engineer a new way of developing product "families", through the use of common design elements cutting the development cycle hnt at the same time providing leeway for engineers to adapt basic products to specific customer needs. At the belm of Otis is Jean-Pierre van Rooy, an ebuilient multilingual Belgian who believes in the company developing a strongly international character while reflecting local characteristics and follow-

ing the views of customers. He is particularly optimistic about sales prospects in East Asia. "By 2010 China will be the higgest country [by sales] in the Otis world and in the first 50 years of next century we will bave a Chinese president," he says. At present, China accounts for only a small part, ahout a fifth, of Otis's total Asian revenues, now about \$1.5bn a year. North and South America account for some \$1bn a year of husiness, and Europe virtually all the remaining slice of some \$2.5bn annually. Otis's approach to doing business must vary depending on the market characteris-

tics of these different regions, van Rooy says. In the last-growing economies of East Asia, the split of Otis's revenues is roughly 70:20 between new equipment and spares and service, reflecting the large number of buildings being erected. In Europe and North America, the split is the reverse.

The greater importance of service-linked revenues has meant Olis has to develop a new "service culture". according to van

Otis, Lego and John Crane are in mature industries, with few signs of spurts in demand for their products in their main markets

Rooy in which managers have to get closer to customers to react to their demands. They must also look out for opportunities to fit new hardware to existing lifts and escalators that will enhance performance. These ideas are ensurined in what the company calls its Service-2000 hlueprint.

greater accent on new computer techniques - such as remote monitoring of elevators for faults using a combination of radio waves and electronics sensing - by which it reckons its products to the next century can be differentiated from competitors,

In the European division, the ideas about getting close to customers are heing rammed home through two-day training packages which some 1ā,000 Otis employees fout of a total of 26,000 in the division) are going through in the oext year or so and which draw on lessons from the IMD programme.

While van Rooy first sketched out the main elements of his Service-2000 blueprint during a vacation on the French Riviera in 1994, the ideas behind the new management programme at Lego came to Kjeld Kirk Kristiansen during a long illness in 1993 and 1994, from which he is said to have made a full recovery. Kristiansen, a quietly spoken, intensely private Dane is presideot of the company and grandson of its founder.

"in the 1980s and early 1990s. we had in a way been too successin!" be says. "We were being driven too much hy the past, side Denmark - cut drawn on formal meetings and spend more time "coaching their employees and getting them to develop their skills rather than trying to control them".

A central element is that managers in key countries such as Japan, the US, Germany and Britain, are given much more autonomy over decisions related to mix of products (such as the different Lego kits featuring figures like Pirates or Black Knights) which they will push towards retailers, and also over questions such as the type of packaging which they think will do best in specific markets.

Legn is also honing its product development plans, as a result of which about a third of its 300 or so product types are changed every year, to speed up the development cycle. It is hringing in to these conversations much earlier than in the past marketing people from different parts of the world. Up until a year or so ago, most decisions over new products were taken almost exclusively hy headquarters staff in Billund.

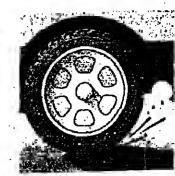

The company, via product development groups to Denmark, the US and Japan, is also planning to use the Lego brand in a new series of interactive computer systems (one of which it is developing in collaboration with Mindscape, the Californian software developer owned hy Pearson, publisher of the Financial Times), to an effort to hit back at companies such as Sony, Nintendo and Microsoft which have through their own products been eating into Lego's revenues.

By contrast with Kristiansen, John Potter, the chief executive at John Crane, is a no-nonsense British manager keen on cementing links between marketing people and engineers. He carries around with him a file marked "Philosophy" which sets out ways to bring this about, for exampla through interdisciplinary product development committees.

At John Crane, interest in information, technology has culminated in a grandicse scheme to link the company's sales centres in 50 countries via satellite, so that customer requests (for specific assemblies of parts) can be met more readily from the company's two main factories, in Chicago, and in Slough, UK. According to Potter, such communications links are vital if John Crane is to make progress in meeting demands from customers for replacement parts - which account for two thirds of Its business - as quickly as possible.

Another big effort has been to establish a worldwide system of product development to get ideas more quickly into the market. A "new product" committee of 10 senior people from around the world, drawn from divisions of the company covering sales, engineering, finance and marketing, meets under Potter's supervision every three months to review new ideas for new "families" of seals - which use, for instance, a new material or radically different design. The good ideas get pushed immediately into a crash development programme stewarded by a "product champion" who is appointed for that particular scheme. As a result, Potter reckons new ideas are getting pushed to the marketplace to less than two years, compared with roughly seven years

years, compared with roughly seven years at the begining of the decade. While John Crane's culture is rooted firmly in the engineering tradition, before setting up its new development system the company talked in detail to companies in non-engineering fields including 3M, Procter & Gamble and Coca-Cola about how they managed the product development process. Flexibility of mind will be increasingly important according to Potter. "The product champions are a case in point. We have six of them at present and their numbers will grow. They will be people able to shift focus fairly quickly, reporting to the marketing side of the company hut being able to pick up influences from a lot of different directions."

FAST TRACK Alfa Chemicals Italiana

The anti-inflammatory drug naprozen is widely used as a painkiller. It is doing Alfa Chemicals Italiana a lot of good,

Alfa used to be just one of many Italian bulk pharmacenticals manufacturers that proliferated in the 1970s when Italy was not a signatory to patent laws. The country provides about 70 per cent of the pharmacenticals used to make ils generic drugs.

US generic drugs. Alfa's transformation into a leading independent supplier of active medical ingredients began in 1992 with a management bny in by Italian chemicals engineer Pietro Stefanutti and two partners. Stefanutti and two partners. Stefanutti, whn had been looking for a career change from his job with Exxon, had created two bolding companies - one of which was Pharmaceutical Fine Chemicals. Through PFC he acquired Alfa, then the chemicals division of the Schlapparelli group.

"We bad to explain to the workforce where we wanted to take the company and that it was now a core business," says Stefanntti. A turnover of L28bn (£12m) CHECK in 1992 became L78bn in 1995, of which L15bn was added by an acquisition. A L6bn after-tax loss became a L6bn profit.

"Generic drugs are a tremendous growtb sector as products come off-patent, translating into lower cost of medical treatment," says Stefanntti. "The trick is to identify products that will make good generics five years before a patent expires and then to come up with competitive processing"."

regulatory requirements." The patent for naproxen, originated by Syntex, lapsed in 1993. The world's six leading manufacturers - with PFC in second place - produce about 2,000 metric tonnes a year and Stefanutti estimates annual arket growth for naproxen of up to 7 per cent. He projects, however, 15 per cent annual growth in sales at PFC, without acquisitions, on the back of high-quality technology and sales to countries where growth in naproxen consumption is higher than the average. Stefanutti says he was attracted by the challenge posed by complex regulations which involve both his client companies and the US Food and Drug Administration - the North American market consumes two-thirds of naproxen output. He accepts that barriers to success involve . regulatory and patent issues and believes Alfa bas gone a long way towards resolving them through its recent purchase of a naproxen plant in the Bahamas from Syntex-Hoffman La Roche for \$80m (£53m). Besides enhancing Alfa's presence in North America, 4 ) Babamas base mitigates the impact of European supplementary patent certificate rules which prevent development work on a product before it comes off-patent. This saves valuable time in bringing a generic to market. Since 1994 Alfa has had risk capital from the Italian branch of 3i, the UK investment bank. By investing L11bu in the Bahamas deal, 3i lifted its stake in PFC to 45 per cent.

respond to the rapid inroads into its markets recently by makers of electronic toys. Traditionally highly centralised at its beadquarters io Billund, central Denmark, Lego is trying to push more responsibility for decisions to local managers - a process which it believes will heighten responsiveness to market trends. This was formally launched last autumn. Following this up is a programme being worked out for Otis hy IMD in which 120 senior managers from the company's European division (which also takes in Africa and the Middle East) are being trained in

new ways to respond to customers. in development terms, Otis is also putting

and not concerned enough with the future. I is realised we had to become less structured of in what we do and react more quickly to external events,"

Kristlansen's plans are contained in a project he calls Compass - signifying a clear direction. Under this the company's top 300 managers - half of whom are out-

I'll clear my desk (when I have time)

riday, just in case you missed it, was International Clear your Desk! Day. I know this because use of the world's leading experts in tidy desks sent me a press release warning me of the event. This contained the usual mixture of exhortations and populist statistics: if we all threw away the junk on our desks there would be enough rubbisb to go around the M25 twice.

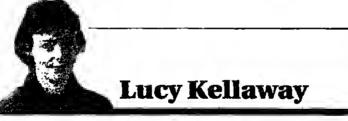

It went on to warn that underneath the piles of paper are missed opportunities – connections oot made, reports not read and letters not replied to. And as for the state of the nation's fuling cabinets – apparently 85 per cent of the stuff stored is never seen again, and 45 per cent is also stored somewhere nearby.

"Someone's trying to tell you something," said our secretary as she handed me the release. She looked at my desk with its familiar piles of old FTs that have gone beige with age, tottering towers of unread (and unreadable) manage-

ment books, magazines, old press releases, tea bags, dirty cups, biscuit wrappers as well as a toy iron. For a minute I felt guilty and thought that I really should clear it up. But I did nothing. Partly It was because tidying is boring and I baven't got the time. But the main reason that I let toternational Clear Your Desk! Day pass me by is that f don't believe it makes much differeuce whether your desk is clear or not. I organise myself in my own way, and nost of the time my system works fairly well. I know (roughly) what I've got on my desk

and troughty) where it is. I have just done a survey of my lease colleagues and concluded that there is no relationship between performance and state of the desk. The sample range was pretty wide: at one extreme was a desk so manically tidy that it was a fashion statement - all hare save a vase of white tulips.

The neighbouring desk, at the v other extreme, was so untidy that t most of his piles had collapsed on to a

the floor; a dead spider plant and a wine glass full of dust were adrift on a sea of paper. Yet both occupants are bardworking journalists who miss ueither appointments oor opportunities. Adduittedly one colleague speeds a lot of time rummaging though the piles looking for things, although possibly no more than the other spends time at the filling cablact and at the florist. But even if it could be shown that

but even in it could be shown that the messy desk interfered with one's ability to do the job, messiness is surely in the genes, and it would take a tot more than Interpotional Tidy Your Desk! Day to make any difference.

This doesn't mean that we should be allowed to be as unlidy as we wish. According to the press release, clear desks are not about cleanliness, but about decision making. Not only do I disagree with the last bit. I disagree with the first hit, too. My desk is an eyesore, a fire risk and a health hazard. So, in the interests of cleanliness, I am going to tidy it up. Next week. When I have time.

 I have discovered evidence of a new form of discrimination at work. It is sportism, and it is rampant. According to a survey by Company Barclaycard. 49 per cent of managers favour job candidates who take part in active sport, while a mere quarter believe that the sporting activities of prospective employees are not relevant at all.

If I were the manager of a football team, I daresay I would take a player's ability at sport into account before signing him. But were I hiring someone to do my filtog (for the purpose of argument) a candidate's prowess on the sporting field would be as immaterial as their sex, age, sexual orientation or race. While most managers are aware that they should not discriminate on the latter grounds, they are proud to do so on the former. They justify their preference for jocks hy claiming that they are better at working in teams, they want to win, are selfdisciplined and have better social

skills.

As a non-sporting person myself I Ind this not only offensive but deeply upsetting. Haven't we been discriminated against enough

already? At school not only did we suffer by always being the last to be chosen for the rounders team, hut were excluded from social groups because we could neither hit nor catch a ball. But in those days there was the comfort that as soon as you left school, sport would not matter any more. Grown-ups, so we believed, only cared ahout your intelligence, your ability to work, your personality. Sport simply didn't come into it. Even the argument that people

who play sport are bealthier and therefore off sick less won't really wash. Possibly it applies to people who take a modicum of gentie exercise, but it does not apply to those who play team games of the sort which allegedly make employees so desirable.

If you play a lot of competitive games you get injured - and are just as likely to be off work because you have done your back in playing cricket than because you have spent too many sedentary hours in a badly designed chair.

John Simkins

## **BUSINESS EDUCATION**

BANX

"I DID MY DEGREE IN TRIPLICATE."

# Public-service employees are now acquiring the skills of their commercial counterparts, says Della Bradshaw Back to school for civil servants

n July, yet another group of civil servants will visit rundown areas in Deptford in south-east London. But they will not be the usual collection of housing or benefit officials. This group will be students on the public-sector master of business administration (MBA) course who have opted to take a social policy unit on urban regeneration.

996

5

Q,

Their particular focus will be on how such projects can be effectively managed.

Some 40 of Britain's high-flying civil servants, from departments as diverse as the Scottish Office and the Ministry of Defence, are studying for either the one-year full-time or for the equivalent part time public sector MBA. The course has been specifically developed to reflect the changing focus in the civil service intended to replace the image of bowler-hatted, tea drinking pen pushers with that of an efficient workforce with up-to-date Imanagement skills.

The courses are being run by Imperial College, in London, and a consor-tium of Cranfield University, Manchester Business School and the Civil Service College, which has developed

the Deptford social policy "elective". Though specific elective courses have been developed for public-sector students, the bolk of the taught ments of the MBA - marketing, say -to the needs of the public sector. "One courses are taken alongside students on the general MBA course.

"It's an MBA like any other, with a civil service specialisation," says Sue Birley, director of research at Cranfield.

One of the cabinet prerequisites for the course was that public-sector employees should mix with their ers in commerce. "The most important asset has been the other students," confirms Ross Newby, one of two students funded by the Treasury to study for the MBA, in his case the full-time course at Cranfield. Much of the course material is

applicable to both the public- and private sector students, believes Newby. "It's not really possible to say this bit of it is particularly relevant. It's all hroadly relevant."

While some students find the switch from deskwork to coursework difficult, Newby believes the course content is not too taxing. What be does find stimulating, he says, ls

of the most interesting things has been to think through and translate those ideas for a not-for-profit organisation. For example, are we looking for an organisation which is about reducing costs or one which is innovative? he contract for the public-sector MBA courses has been awarded for just three years,

with a maximum of 180 students graduating at the end of the process - just a fraction of the 500,000. or so, civil servants working in the UK. Participating husiness schools are clearly boping the contracts will

be renewed. But whatever happens, says Birley, the public-service electives will remain a part of the MBA programme, as 20 per cent of the students on the courses already work in the public sector, either in the UK or overseas. Glynn Llewellyn, director of specialist development at the Civil Service College, traditionally the training

ground for civil servants, is more pos-

few UK civil servants. With the spe-

cialist courses for the public sector being continually updated, civil ser-

terparts, could soon be queueing up. With the first group of MBA stu-dents graduating in September the sponsoring government departments will soon bave to face a concern well-known to the private sector: bow to re-integrate the students back into the organisation. Newhy believes it would be a great pity if he had to return to his old job after all the investment has been made. Birley agrees. "It is important to recognise that these people have

## SPORT / ARCHITECTURE

# Press pack scents profit in game of two halves

## Keith Wheatley on plans for UK sports-only publications

Many countries have devoted entirely to sport, but Britain has never been one of them. The consensus - somewhat self-serving - among newspaper executives has been that

12

the strength and circulation of the UK's national press gave the fans all the sport they wanted or needed on the back pages of national newspapers. But the cosy assumption that a national sports title would not "work" is about to be challenged, and may have to be abandoned. The next few months will see sev-eral titles launched in an attempt to start a new ballgame. First off the blocks, next month, will be Sport First (as in: "Which bit of the paper do yon read first?"), edited by veteran sports journalist Boh Harris. Harris had been executive sports editor

of the Sunday Mirror after a spell with Eddy Shah's mould-hreaking Today, but was put out to grass as "too old" at 50. "It's going to be football-led," says Harris of Sport First, "but we'll be heavily involved with the Olympics and with Wimbledon."

Keith Young is the poblisher behind Sport First. His company, Parliamentary Communications, has titles varying from The House Magazine (behind the scenes at the Palace of Westminster) to the Church of England's weekly newspaper. He describes the £3m (\$4.5m) launch fund for Sport First as a mixture of privately placed City of London finance and his own money.

"If the idea works we've got adequate successful newspapers funds. If it doesn't, then £10m wouldn't be enough," says Young, adding, tongue in cheek, that his main motivation comes from being an Everton supporter who lives in the south of England and cannot get enough news of his team.

In fact, the ambitions of Sport First are modest. It aims to be a "second paper" and needs a total sale of only 100,000 to be in the money. It will have a broadsheet format to avoid the appearance of tackling the aggressive tabloids head-on.

Young says that stealing readers off the tabloids is not the name of his game. "If I can't produce a sports paper that sells a combined 100,000 copies in cities like New-castle, Glasgow, Sheffield, Birmingham, Manchester and Liverpool, then I'm not very good at my job," he says. He knows provincial sport intimately after 25 years with Thompson Regional Newspapers.

He believes fervently that Britain is undergoing a cultural revolution, with football becoming a passion that crosses lines of class, gender and age in the way it does in Italy. "In the City it's now acceptable to say that you watch foothall and follow a team. It may be coincidence, but [former prime minister] Margaret Thatcher could never understand what all the fuss was about, whereas John Major is a sports nut," says Harris. He may be right. But another view says

this is a cyclical process that happens every 25 years or so - football as fashion, not passion. In the late 1960s, football was an aspect of swinging Britain. George Best of Manchester United and his immediate

contemporaries were the first players to be part of show business. The stands at Chelsea and Manchester United were full of beautiful people watching the heautiful game.

Within a decade it was gone - wrecked by rapacious managers, boring teams and, above all, trainfuls of drunken louts armed with enough aimless aggression to fill a Martin Amis novel. Will it really be different this time? In London, the metropolitan police are privately duhious. They have been discreetly briefing those who need to know about their considerable plans to deal with massive outbreaks of booliganism during Euro 96: the finals of the European foothall championship, which England is staging from June 8 to 30 - its higgest sports fiests for 30 years.

One man who believes that the surge in interest in football is not at all faddish is Chris Nawrat, another would-be publisher whose project is based entirely on the belief that football has become the focal point of many British lives. Nawrat is a former Sunday Times sports editor, a man who lives for football and who plans to launch Soccer on Sunday at the start of next season.

Nawrat was once my boss. We got along more because of a shared interest in American literature than because of any agree ment over the possible content of the sports pages. He was unflinching in his belief that readers wanted ever more football.

"It's nonsanse to suggest that there is any such thing as a British sports fan who wants a little bit of everything every week.

Fans at Saturday's FA Cup final in London: will their ardour fade?

In reality, the only interest in tennis is during Wimbledon; in rowing at the [Oxford-Cambridge] Boat Race; boxing when Bruno fights," argues Nawrat. "Yet the papers clog up their pages with this stuff because they think they have to cover the 'big picture'. The No I sport in Britain is football. The No 2 sport in Britain is football. The No 3 sport in . . . I could go on."

If it gets off the ground, Soccer on Sun-day's editorial mission will be to report every league match In Britain. Each Premiership club will have an assigned correspondent. A hig match might warrant four, six or even eight pages of coverage. If this sounds preposterously ambitious to

British readers, who long ago resigned themselves to the death of their sporting Pink 'Uns. nothing Nawrat proposes would seem that fanciful to an Italian or Spanish soccer fan.

Italy's La Gazetta della Sport has small bands of journalists who will devote entire careers to covering ~ say - Juventus. They start by covering reserve teams, and after a working lifetime qualify to interview the manager. Not a ball is kicked in Serie A without Gazetta devoting a couple of broadsheet pages to it. In Spain, the country's higgest selling newspaper is Marca (To Score), a football-driven sports daily.

In Spain, football is treated with an

intensity that goes beyond mere match reporting. In one 21-day period over Christ-mas and New Year recently there was not a single league game in Spain. Marca still managed to lead the front page with a football story on each of those days.

Nawrat is talking, with some success, to venture capitalists who, increasingly, follow football themselves. "They know that it's more acceptable, more sexy than it's ever been before," he says. "Melvyn Bragg [the British novelist and broadcaster] recently wrote that football unites the nation in a way that nothing else does. Five years ago it would have been inconceivable for someone of his cultural influence to have said that."

his is the year of William Morris. One hundred years after his death, the anniversary is marked by an important exhibition at the Victoria & Albert museum in London which runs until September, My colleague William Packer has reviewed the exhihition, considering Morris as artist and designer. But it is impossible to categorise Morris. Indeed, architecture was fundamental to a man now remembered more for the rural density of the patterns on his textiles than for his concern for buildings. However, the exhibition tries to show the unity of Morris's ideals. He wanted the arts and architecture to work together to create an earthly paradise,

Running parallel to the Morris exhibition is a display in the museum's Henry Cole wing of "Arts and Crafts Architecture". This explores

## William Morris, utopia's factotum Categorising the designer, even a century after his death, is impossible, writes Colin Amery

the development of domestic architecture from the 1850s and attempts to discover bow other designers had absorbed Morris's ideas. Most visitors will be so well nourished by the Morris show that the mere thought of another helping of arts and crafts may be too much.

That would be a shame, as architecture does not get enough attention in the main show, Architecture has to fight for space alongside textiles, furniture, ceramics, wallpapers, linoleum, stained glass, carpets, tapestries, embroideries, printed books, calligraphy and Mor-ris's work as a fervent socialist

committed to creating utopla. Morris was 22 when he signed his articles as an apprentice to George Edmund Street, the leading Gothic architect, in Oxford. He stayed only a year, but learned from this taciturn designer the importance of materials and also watched how Street incorporated all the crafts and was able to achieve powerful architectural effects from a wide range of materials. Street was the father figure of the arts and crafts movement: Morris met his greatest friend, Philip Webb, in Street's

But there was an important dif-

ference between Morris and Street. Street was a restorer of old huild-ings while Morris bad a horror of restoration which was to inform his approach to architecture and inspire him to create the Society for the Protection of Ancient Build-ings. In 1877, Morris acted on Ruskin's idea for a national society to campaign and train architects to appreciate the need to care for buildings of the past without altering them. Their manifesto still applies: "Take proper care of your monuments and yon will not need to restore them. Watch an old building with anxious care; count

its stones as you would jewels of a Canterbury Cathedral prompted crown - better a crutch than a lost limb, do this tenderly, reverently and continually and many a generation will still be born to pass away beneath its shadow."

Not for nothing was the new soci-ety known as "anti-scrape", lt campaigned for the retention of the patina of the ages while encouraging the best of the new to be built alongside the old. The campaign was given urgency hy the rampant advance of the Gothic Revival upon the medieval churches and cathedrals of Britain, with George Gilbert Scott as leader. The threats to

Morris to write to The Times complaining that Scott would leave behind the "usual mass of ecclesiastical trumpery and coarse daub-

Morris was not a sentimentalist. His message about old buildings has often been misunderstood. He did not want feeble copies of past styles - he felt the pure conservation of the hest of the past would encourage modernity. His approach was creative. He would have hated the ghastly neo-Geogians at work today, timidly afraid of the real possibilities of contemporary architec-

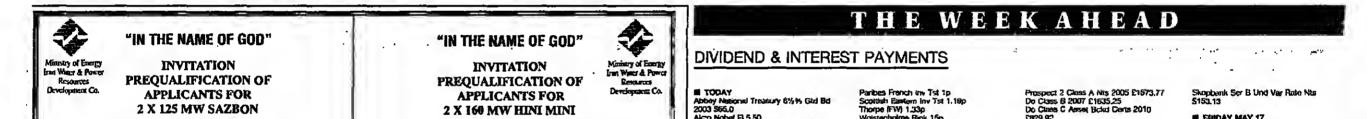

"Why, I could carve them better with my teeth". Morris saw, too, that landscape and buildings cannot be separated. He was involved in the formation of the Commons Preservation Society and the Kyrle Society, where he campaigned against environmental damage, ugliness and urban squa-lor. He would have been part of the protest groups trying to stop nuclear waste in Germany or the Newbury by-pass in England.

ture. His view of some Victorian

pseudo-Gothic carvings in a newly

restored church was forthright:

He managed to marry the ideas of socialism as a valid criticism of political ecocomy with an artist's vision of romantic anti-industrialism. His centenary prompts the thought that his intense creativity and vision are as valid now as when he died.

#### MEDIA FUTURES

# Shining Path wages flame war

Simon Strong tracks the Peruvian communist guerrilla group to its Web site

t was never easy to obtain official documents from Shining Path, the Peruvian guerrilla group which launched its war on the state in 1980. They had to be obtained from activists who tended not to be available for very long - death or asylum were usually just around the corner.

Possession was also a risk. By 1992, after about 30,000 lives had been lost in the war, the government's repression of the guerrillas had become so random and draconian that one man spent six months in jail as a suspected terrorist after being caught making a photocopy of my book on the subject.

Last month, however, Shining Path launched a Web site on the Internet. The official documents of the Communist Party of Peru - Shining Path's real name - became instantly accessible worldwide. Distributors and readers alike need fear reprisals no longer.

The Web slte address arrived by e-mail in response to my own e-mail inquiry to a US pro-Shining Path magazine, New Flag, with whose address (lquispe@nyxfer.blythe.org) I had in turn been provided by somebody close to the organisation.

Yet attempts to access the page

through Compuserve failed. "Eitber Compuserve is denying access or it is being denied by the page," a hotline assistant said. After more consultation, be blamed the page format. He denied there was censorship,

Netscape, bowever, proved no problem. Portraits of Marx, Lenin and Mao emerged like faded ghosts on to my aged black-and-white screen. Five but-tons offered routes to "Frequently Asked Questions" about the "People's War", as well as to the party's docu-ments in Spanish and English, to back issues of New Flag and information on "President Gonzalo" - the nom de guerre of Shining Path's founder and leader, Abimael Guzman.

For any analyst of the Peruvian guerrilla war, the Web site is a remarkable find. Party documents confirm, for instance, that Shining Path helieves that Guzman's letters and videoed TV appearance in 1993 - when, in an extraordinary jail cell volte face, he appeared to admit defeat and call for peace talks - were an elaborate hoax. In the free-market fiesta of President Alberto Fujimori's Peru, such an Interpretation of the incident is heresy. When I raised it on a radio news-show.

the interviewer bung up. But woe betide Peru if it were right. However, not only does the Weh site provide Shining Path with a means to combat the state's well-executed psycbological warfare. It also has a more

sinister side. The documents, turgid and propagandist as they are, convey neo-Maoist political guidelines to supporters worldwide. One page still under construction hears the ominous title "Instructions". Elsewhere on the Net. Shining Path

activists engage in flame wars - verbal lacerations - that range from the farcical to the deadly. These occur mainly on Marxism discussion lists managed, it would seem by the address, from the University of Virginia in the US.

"Harriet" is one of the main protagonists. Whether the discussions concern Shining Path's attitude to gay rights or "snitches" - revisionists/informers -Harriet bashes everyone with garrulous and articulate delight.

Yet Harriet, who signs her letters with his real name, Adolfo Olaechea, goes beyond merely justifying the murders of leftwing Peruvian leaders. Those who defy Olaechea's perceived call to support the killing of Michel Azcueta, a

district mayor in Lima who has survived several attempts on his life, are warned of the grim inevitability of Shining Path's final triumph and the retribution to come. "I was simply presenting an orthodox marxist point of

view," says Olaecbea. The marxism@virginio discussion lists are high volume. Within a week of my subscribing, Compuserve telephoned because my message basket was bloated and blocking up its system. To the infuriation of many participants, the lists are swamped by Harriet and his cohorts.

According to Olaecbea - who in absentia has been sentenced to life imprisonment in Peru - his country's intelligence service participates, too. "They sucked in messages on one Peru list in such a way that mine and others' were then lost in cyberspace," he says. "Also, they have used an account in Germany to send death threats in my name to try to create rifts,"

Although the high-velocity Net com-munication seems in itself to fan endless splits among Shining Path's international snpporters, this is small consolation for Azcueta. Like the party's Web site, he could be hit anytime.

Tim Jackson Dial 'N' for nemesis

In New York last Thursday an extraordinary but unpublicised meeting took place. brought

It

together two groups of people who, over recent mooths, have become hitter opponents: long distance phone companies and Internet husinesses.

The meeting was called against the background of a petition filed this spring hy a group of long-distance carriers with the US Federal Communications Commission, begging the FCC to do something to outlaw use of the Net to offer telephone services.

Since this column first started discussing Net tele-phony last summer, about 1m people have acquired software packages that allow them to bold conversations with people in other countries. Not all these people use the software, and not all the different packages available can talk to eacb other, hut a critical mass has been established that will soon make telephony via the Net a serious possibility for many computer users.

Further striking developments have taken place. Netscape Communications, the company that owns four-fifths of the market for World Wide Weh browser software, bas released a beta test version of a new browser, Navigator 3.0, which incorporates telephony functions. A company called ShadowTel has come into conflict with Canada's telephone regulators by offering custom-ers a package of cut-price Net-based phone calls to the US. And Vocaltec, the leading telephony software provider. has given the first public demonstrations of a new Net-to-phone package that will allow PC users to call not only other computers around the world, but also any standard phone.

The stage is set for a half-year or so in which Net telephony, if unregulated, can be expected to make serious inroads into the long-distance and international revenues of the world's higgest telephone companies.

www.intranet.co.uk

The Complete Solution

for the Intranet

Which raises an important policy issue: should regulators stand by while this happens? At first sight, it is hard to see why not. Telephone compa-nies make far bigher margins оп international and long-distance traffic than on local calls, and so have forced a minority of customers to subsidise the rest. The arrival of Net telephony, and the carnage it will wreak on telephone companies' profit and loss accounts, can be seen as an act of justifiable revenge by a much maltreated group

of customers. But allowing Net telephony to grow unhindered would invite one form of economic inefficiency to replace another. The present inefficiency is an artificial increase in the price of long-distance calls, and a consequent reduction in demand. Unrestricted Net telephony would introduce the opposite inefficiency; because Net service providers do not have to make any contribution to the cost of carry-ing local calls from subscribers into their switches, it can be argued that they can sell

The opposite distortion

involved in the traditional carriage of long-distance calls, bowever, is mauy times greater, in the US, local access charges paid by a long-distance phone company to cover the costs of the last mile of copper at each end can account for as much as 9 cents per minute. No wonder many long-distance phone companies pay half their reve-nues to local phone monopolies to settle these charges. Last month, Prof Joseph

Farrell, chief economist of the FCC, said that regulatory

agencies like his own should do nothing to hinder the growth of Net telephony. Underlying his words - which had not been cleared before hand with the commissioners, hut seemed to reflect the views of the FCC's staff - was the clear belief that the smaller distortion makes tol-eratioo of Net telephony the ser evil.

Last week saw an interesting divergence of strategy among phone companies. British Telecommunications continues to argue that Net tele phony is little more than sleight-of-hand and regulatory arbitrage, since it is for tech nical reasons a less efficient use of bandwidth than carrying the same calls across the public network.

But this fails to take account of the fact that even without an efficiency advantage, Net competitors can undercut the phone companies' prices by 90 per cent or more because margins on traditional long-distance and international calls are so

in America, meanwhile, the telecoms industry is becoming pragmatic. The very holding of last Thursday's meeting – a discreet worksbop, billed as a search for common ground is a recognition that what ever else happens, the distor-tions inherent in the access charge regime cannot continue. No matter how the bal ance of advantage is struck the days of paying dispropor tionately for local-call access are numbered.

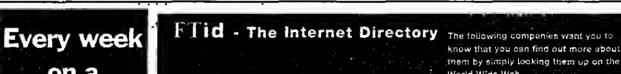

This, then, may be the first way in which the Net fulfils its promise to revolutionise the world. Like the Berlin Wall, the entire system of telephone-call pricing, with its rising tiers linked to distance called, may come crashing down. Never mind the Inter national Telecommunications Union and its accounting rates: never mind the bureau crats in Brussels and their glacial progress towards liber-alisation. Within a year, the Net could be responsible for cutting the price of international phone calls hy half or tbree-quarters. um.jacksomā pobor.com

Net-hased telephony services at an artificially low cost. The key question is which

distortion is more pernicious. Although it is always difficult to allocate costs in the telephone system, where most of the beavy hills are up-front and running costs are minimal, it is probably fair to say that the marginal cost of local calls is a fraction of 1p per minute. It is the difference between this amount and zero that is the distortion in favour of Net companies,

The poor image of the technology as "Big Brother's little helper" may be altogether undeserved, says Alan Cane

The smart card - a piece of plastic the size of a credit card with a computer embedded in it - offers numerous benefits, but will force a re-evaluation of attitudes to privacy and data protectinn, says Demos, the independent think tank.

Its report, nne of the first to analyse policy issues raised by the rapid prnliferatinn of smart cards in areas such as finance, bealth and public administration, warns that the benefits will only accrue when people are confident the technology will ant become "Big Brother's little helper", as the authors put it.

Helpfully, Demos snggests policies to sidestep what it sees as a "sterile confrontation" between civil libertari-ns and anthoritarian govern-ment and business interests in far recall by a doctor. tion distributed through socipromoting the benefits of ety in a variety of forms - the smart cards. credit card model bas been

We have argued that people will trust in these technologies when they can choose anonymity where they want it and have greater control over the nse of personal information beld abont them," say the authors

What distinguishes the smart card from other infurmation technologies and gives it its power is the capacity to

concentrate and manipulate a buge amount of information in a tiny space. A reading device is necessary to view the infirmation, but smart cards compute as well as store data. Software can be incorporated to encode the data, rendering it unreadable to anyone witbunt the

right key. What can smart cards be used for? Their main use now is as telephone cards for public pay-phones, but they have the potential to identify individuals, to act as an electronic wallet for cashless sbopping, and to provide a secure and portable information store. Medical histories could be stored on a

adapted for convenience

rather than because of limita-

tions inherent in microcom-

accessories in the future

national identity card: a government-issned, multi-functional card, with the populace baving little or nn choice about which applications were available on the card - and perhaps no say abont the privacy system employed.

Regulation of the privacy system - encryption - ts important. It is comparatively easy to devise encryption methods which are almust impossible to break within a reasonable period. That worries guvernments fearful of being anable to unpick com-munications from terrorists smart card, for example, ready Visionaries talk of virtually and the like. The US has attempted to forbid the export unlimited amounts of informaof the mare powerful US cryp-

tography systems. The Demos researchers argue that such tactics are cnnnter-prndnctive. Tbey favour a private "key escrow" a system where cryptography users deposit the key to their system with a trusted private registry, approved and regu-lated by governments. "Government law enforcement agencies would have to obtain

a court nrder on the basis that

read it? The Demos researchthey bad strong reason to ers are critical of suggestions by Michael Boward, Britain's helieve that an individual or company that had escrowed bome secretary, that a smart card could be used as a their keys . . . was guilty of some crime". The report proposes a radical reform of data protection legislation through some 10

snpplementary conditions. Data users, for example, would have to get express consent from individuals for the use to which they would want to put the data. Rules on disclosure to third parties would be tightened. so that data users would have to receive specific per-mission from a data protection registrar in order to gain access to specific information. It argues that individuals should be able to choose the card they want, and decide what information and applica-tions will be loaded. "Where [Michael Howard's] card is an essentially anthoritarian instrument, our proposal is for a more market hased instrument in which the role of government is to align the incentives within the market to ensure privacy, trust and individnal access and control," says the report. On the Cards, by Perri 6 and

US airfares tumble

i4

As cut-price, no-frills airlines start to spread their wings in Europe, the US experience augurs well, where they have dragged down the overall cost of flying by up to 40 per cent.

The US Department of Transportation reports that on routes where the no-frills outfits compete with conventional carriers, the average one-way ticket price has fallen from \$148 (£97) to \$94, or from \$173 to \$103 if one of the destinations involved is a leading airline hob. The report estimates that the emergence of carriers such as Southwest Airlines and

passenger numbers in markets served by low-cost operators tripled to more than 100m. while falling elsewhere. In the pink The sugar-pink Mount Nelson Hotel in Cape Town is

Victoria Griffith

Stephen Fidler examines the role of Latin American governments

n April 2 this year, at 10.30am, the main international airport in Buenos Aires was plunged into darkness for nearly an hour. It had not paid its electricity bill since November and owed the power company, Edesur, \$830,000 (£547,000).

That afternoon, Oscar Camilión, the minister of defence, contacted Edesur, promising prompt settle-ment. Ezeiza, run by the Argentine air force, comes under Camilion's jurisdiction. The power cut prompted an article in La Nación newspaper, pressing for the privati-sation of the airport, which handles 4m passengers annually.

For some years the private monopoly running air cargo in Argentina has been the centre of a political debate. Complete control of air freight in Argentina by Edcadasa, owned by Alfredo Yabran, has been criticised by economy minister Domingo Cavallo and his allies.

So far, the armed forces and Yabran appear to have succeeded in slowing the airports' privatisation. There is evidence that poor management of the airports is compromising air traffic safety.

For example, the country's two main airports, both in Bnenos Aires, together handle an average of 320 aircraft a day. They are monitored by a single radar, with a repeater in the downtown airport, Aeroparque.

According to a report by Andres Ricover, an air safety consultant based in Buenos Aires: "This 20year-old radar has begun to suffer frequent faults, leaving the entire area of Buenos Aires 'blind' for up to 10 days at a time."

Pilots also report confusion and poor comprehension of English among Argentina's air traffic controllers, says Ricover.

The safety scores

air traffic control area - were assigned a hlack star in April 1995 hy international airline pilots, implying critical deficiencies in safety standards.

The pilots' assessors complained that some runways lacked approach lighting and some taxiways were without lights, while some aprons had confusing markings. They con-cluded: "Landings not recom-mended in heavy rain and crosswinds exceeding 10 knots."

Ezeiza has recently installed instrument landing systems but inexplicably invested in old technology which does not allow landings in zero visibility.

Argentina is not alone in having its civil aviation run by the military. Paraguay and Uruguay, both of which are classified as having unsatisfactory air safety supervi-

A general heads the civil aviation board, but he is independent from the government and armed forces, and the board is self-financing and free from interference. Its air safety norms are rated highly. Santiago has the most advanced instrument landing systems in Latin America. Even when ctvilians are in

charge, there are concerns. "In Peru, all international airline safety norms are being violated," says Victor Girao, who flew for 34 years with Faucett Airlines before being dismissed for denouncing alleged management irregularities.

He says pilots' maximum flying hours have been increased, and that some airlines pressure pilots to fly aircraft with defects - and carrying more weight than the manufacturers recommend. Girao says the Boeing 737-200

ARTS

LAUSANNE

The Musee des Beaux-Arts has organised a retrospective of Aristide Maillol (1861-1944). one of the principal French sculptors of his time. Maillol is best known for his female figures, which combine vitality and sensuousness with an abstract quality. The Lausanne exhibition, which opens on Wednesday, features 60 of them, supplemented by drawings, prints and book illustra-

#### CHICHESTER

The playwright Simon Gray, whose "Cell Mates" was scuppered in the West End last year by the detection of the actor Stephen Fry, produces his next play for the Minerva Theatre at Chichester this week. Titled "Simply Disconnected". It opens tonight and stars Alan Bates (left) and Benedick Bates, and is directed by Richard Wilson.

## Opera/Andrew Clark **Disenchanted Tchaikovsky**

ex and jealousy are sup-posed to be fail-safe operatic ingredients, but in Tchaikovaky's The Enchontress the potion fails to work. That was the judgment of his contemporaries, who deserted the initial run in St Petershurg in 1887. It must also be the verdict on New Sussex Opera's production at the Brighton festival. At first sight it was amazing to find this hilled as a British stage premi-ere - hut not so surprising after last week's performance at The Dome, which did little to challenge the view that The Enchantress is Tchaikovsky's weakest opera.

As with Eugene Oneyin, Tchaikovsky's imagination was fired by a single scene. But unlike the Letter Scene in Onegin, which fits seamlessly into its surroundings, the amorous confrontations of Act 111 in The Enchantress are the only instance where musical poetry and dramatic authenticity coincide. The problem lies in the libretto, a long-winded mix of old Russian customs, fairy-tale narratives and romantic tragedy, which Tchaikovsky commissioned from lppolit Shpazhinsky after reading his play of the same name.

The real tragedy is that Tchaikovsky lavished so much good music on a poorly constructed plot. The

Ilm director John Huston

Enchantress, composed between the at worst, a primitive, picture-book Manfred symphony and The Queen of Spades, has the melancholy lyricism of the former and some of the psychological insights of the latter. In true Tchaikovskian vein, it is also a fund of marvellous tunes. Perhaps The Enchantress is the ultimate gramophone opera - though no modern recording exists.

The central character is Nastasya a sexy innkeeper whose free spirit goes against the grain of a patriarchal society. She attracts the attention of Prince Nikita, who promptly falls in love with her - only to find his son Yury has stolen her heart. The climax comes when she rejects the Prince and seduces Yury. Everyone ends up either mad or dead.

here are shades of Carmen and Violetta here - dangerous women redeemed hy love - hnt they were nowhere to be seen on John Lloyd Davies's NSO staging, which failed to establish Nastasya's vulgar, loose-living credentials at the outset. As a result, her transformation into a moral heing had little point. A tauter visual style might have helped.

At best, Davies's designs evoked the skewed symbolism of the early 20th-century Russian avante-garde;

476-301-

The music was in safer hands. The NSO orchestra enjoyed all the dashing scales and woodwind colouring of the score, and David Angus paced it expertly. He also let the singers be heard - a notable achievement, given that none of the voices had the exciting opulence the opera demands.

Virginia Kerr's sweetly-sung Nastasva flowered as the evening progressed, particularly in her confrontation with Doyle Wilcox's Yury. Both were overshadowed by Andrew Slater's Prince Nikita, a keenly felt portrait of aristocratic dignity and obsessive lust. Gerard O'Connor was an effective foil as the censorial patriarch Mamirov.

NSO deserves a pat on the back for its initiative, but there are less demanding operas in need of revival. A work like this needs a higger hudget, bigger stage and higger voices, preferably singing in Russian. Until we get that, *The Enchantress* will fail to enchant.

The Brighton festival continnes until May 26 (01273 709709). New Sussex Opera gives a final performance of The Enchantress at Snape Maltings Concert Hall on May 18.

Artist, activist and egomaniac: Derek Jarman "canonised" by the Sisters of Perpetual Indulgence, September 1991

arman: a true renaissance man

## Sec. 15 . 150 . ledge this is the first time a sizeable play has been written about him. More precisely, Alex Finlayson's

scar Wilda, the man, has been described as the greatest creation of Oscar Wilde, the artist. Derek Jarman, painter, film-maker, theatre designer, writer, gay activist, gar-dener, left a similar impression. "He had a dynamo going around inside him which made him half egomaniac, half very joyful creative person," says Richard Salmon, art dealer, who has handled Jarman's work since 1987.

Now Jarman, who died of Aids in 1994, is the subject of a major retrospective at the Barbican. He was diagnosed HIV positive in 1986, in his mid-forties, and had his first exhibition of paintings with Salmon the following year: "Getting the virus focused Derek in a way that nothing else would have done."

Jarman's last eight years were extraordinarily productive. He made six films, designed two thea-

tre productions and the Pet Shop Boys pop music tour, directed his first opera, took part in over 20 exhibitions and published three books. Salmon cites in particular the two series of abstract paintings made between 1992 and 1993, numbering almost 50 works. "These have a ferocity and energy which I don't believe has been recognised yet. They brought his anger about being ill to the surface.

Initially, the art establishment was uncomfortable with a painter who was also a successful theatre designer. In the 1970s he more or less abandoned painting on discovering the joys of the Super 8 camera, and his detractors considered him lost to endless home movies of his friends dressing up and carrying on. The late 1980s saw Jarman's work being taken seriously for the first time, says Salmon. "Until then he was thought of as half a nutter

included Clark Gable and Montgomery Clift - and especially by the deteriorating marriage of screen writer Arthur Miller and female lead Marilyn Monroe. The part of Monroe in any stage or screen project is a poisoned chal-

ice, hut Lisa Eichhorn acquits herself with honour, capturing the sense of constant fluid movement and the confusion of emotions in her voice (although not the softness of its timbre). Marilyn, fuelled hy booze, pills and a desperate need to prove herself as a "real" actress, is childishly dependent on the counsel of her Method-guru Paula Strasberg (Paola Dionisotti) rather than either Huston or her hushand. Miller, meanwhile, is obsessed with writing the Great American Movie, handing in daily rewrites and stuck for an ending until the film is well behind schedule. The constant delays caused by Monroe'a (and to an only slightly lesser extent Clift's) ner-vous dissipation and Huston'a fre-

are at hest one-sided affairs in terms of passion: truthful perhaps, but lacking in spark.

 inlayson's urge to untangle
 Monroe's psyche extends to writing a disconnected hospital scene in which he gives physical presence to both her hrassy-teenage and insecure-childhood selves. However, the pivotal scene is a gem: Marilyn and Monty open up to each other in a hotel room late one night while Miller single-mindedly pounds at his typewriter next door. The mannerisms of James Clyde's Monty (younger and more effeminately homosexual than the 40-year-old Clift) fall away until all that remain, huddled on the bed, are "two little people in a little boat lost on a great hig sea". Gregory Hersov's production and Laurie Dennett's design make up in verve what Finlayson'a script may miss in insight. Boom mikes, a

goes full tilt for the chaos which surrounded both the shoot and lts "downtime", and if Stephen Yardley concentrates on the tyrannical aspect of Huston and neglects his seductive side, this is still a man whom one can imagine holding up production in order to ride in, and win, a camel race (sadly not repro-

duced onstage). The film *The Misfits* (Gable's as well as Monroe's last picture) is a haunting, underrated work, and Finlayson's play does depend for its full impact on knowledge of the movie, although not to a crippling extent. Monroe's philosophical farewell to Miller - "You wrote me, and I took it, and we finished" - as he stands alone on a darkening sound stage is an obvious but perfect ending. There have been a number of films about stage shows; it is about time the balance was redressed.

At Manchester Royal Exchange, until the June 1 (0161 833 9833). The film is shown on BBC1 tonight.

## Michael Prowse · America Paying for crime

Offenders should be required to compensate their victims financially and not simply serve time at taxpayers' expense

remains an extraordinarily

expensive way of fighting

crime. Instead of benefiting

victims it imposes additional

costs on them because, as tax-

payers, they have to pay for

upkeep of a growing popula-

tion of idle prisoners. What is

needed in the US, and other

countries, is a more imagina-

tive approach to punishment.

very little emphasis on com-

pensating victims. Yet most

crimes are not crimes against

society at large but violations

Under present law, there is

Americans are feeling a fraction less apprehensive about crime. The FBI last week reported a fall in serious crime for the fourth year running. Homicides were down 8 per cent from 1994, perhaps because of more effective policing in big cities such as New York and Houston. Rapes, burglaries and assaults were down 6 per cent, 5 per cent and 3 per cent respectively.

A steady decline in serious crime over four years sounds suspiciously like the start of a trend. A lasting abatement of violence is certainly possible: sustained declines in crime have occurred this century. The annual homicide rate (a good barometer of overall crime) fell by nearly 50 per cent between the mld 1930s and the late 1950s before climbing to new peaks in the 1980s and early 1990s. Unfortn-nately, the recent improvement seems likely to be just a luli before another storm.

it probably mainly reflects demographic changes: a fall in the proportion of males aged 15 to 29 (the high risk years for crime), following the ageing of baby-boomers. The bad news is that demography is now pulling in the wrong direction again. The number of males aged 14 to 17 will rise about 20 per cent over the next decade, with larger increases among the most

crime-prone minority groups. The evidence suggests these youngsters will be even more violent than their fathers, perhaps reflecting the continuing rise in out-of-wedlock births and other social pathologies. While adult crime rates have moderated, the proportion of juveniles arrested for serious crimes has soared in the past lecade (see chart); the numbers of young offenders arrested for homicide, for example, have tripled since 1984

How can society combat such predators? The "lock them up" approach championed by the Reagan administration in the 1980s remains by far the most popular policy. The recently enacted fed-

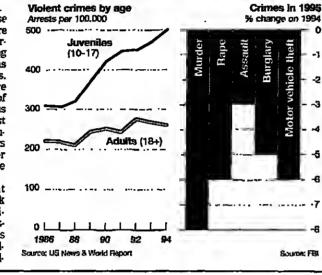

eral "three strikes and you're out" (in other words three serious crimes and you are jailed for life) law is merely the latest manifestation of this policy. In the past 15 years, the penal budgets of most states bave soared. reflecting one of the world's most amhitious prison-building programmes. The US incarceration rate has nearly tripled since 1980 and far surpasses that in most other industrial countries. Some experts advocate an even more intense use of prisons in readiness for the next crime

## We are keen to encourage letters from readers around the world. Letters may be faxed to +44 171-873 5938 (please set fax... to 'fine'). e.mail: letters.editor@ft.com Translation may be available for letters written in the main international languages. Unlikely that | City would be adrift 'sans Emu' egy. But incarceration portion of his income to the

measure would work in practice

From Mr Roger Davis Sir, The Lex column ("Return on investment". March 7) advocates shareholders' use of total return on investment (ROI) measures alongside earnings per share (eps). The theory runs that bad (and good) investment decisions would be

clearer to see. Anything which reduced pressures on companies to report short-term staccato growth in eps would he widely welcomed. Most competent managements apply long-run internal rate of return criteria to investment decisions which then have to be translated into annual eps. But would ROI reduce short-termism? The City has an insatiable appetite for short term results. whatever the measure. Historical cost accountin has many limitations, hut Lex is wrong to suggest its wholesale abandonment. The measure is of actual

investment made, not of what I would theoretically invest in today with the luxury of a clean sheet. The business reality is that management has to sweat its

existing assets and divest if it can no longer do so, And of course ROI ignores the shareholder value of good financial engineering, a major task of management particularly with diverse multi-currency operations. Full marks to Lex for initiating a debate. But start it

at the point of what management itself needs to measure its long-run industrial competitiveness. It would be a bizarre economy which required sharebolders to have something else. And I hope my own profession might for once keep the level of discussion above the arcane technicalities

head of accounting and audit. Coopers & Lybrand, London WC2N 6NN, UK

From Mr Robert Walter. Sir. It is indeed disappointing to read your leader "City sans Emu" (May 9). Even the FT has been infected with Euro-scepticism. The experience of the last 10 vears in the City surely demonstrates that any establishment can be purely transitory. Personnel and their information technology are at X Bank today and can be at Y Bank tomorrow. Cities and countries are of little consequence in this equation: what matters is "where is the market?" Outside a European single currency London may well have a role, but will it be

central to the affairs of the financial community? Today's international transactions will tomorrow be domestic. It's all very well to suggest that the Maastricht criteria will reduce official borrowing to 3 per cent of gross domestic product. But that is still an awful lot of borrowing which will be tomorrow's benchmark. In modern times London bas never been an "offshore centre": could it survive as such when the core markets that determined its henchmark were "on shore"? I suspect not. Within months, if not before the establishment of a single currency, the German and French banks would repairiate

·LETTERS TO THE EDITOR.

Number One Southwark Bridge, London SE1 9HL

their investment banking activities to the core market. There is a euro-dollar market and a euro-yen market in London today, but nobody would suggest they do. anything hut follow New York or Tokyo. A new euro-currency market, sans Britain, in London would be destined to follow Frankfurt. The question then will be, do we shadow a German Europe or are we true to British post-war history and join Emu after the bloody foreigners have made all the rules without us?

## Royalty comparison should be with Europe

From Mr Anthony Mayer. Sir. In advocating freedom from royals, and about the absurdity of some titles setting the wrong tone in society. Micbael Prowse may have drawn the wrong comparison with the US instead of with other European countries "Free from royals". May 6). First to keep in mind is that. besides Spain, almost all north European countries still retain symbolic monarchies to head their state - including two countries like The Netherlands and Sweden which rank among western Europe's most egalitarian economically. Second, the question remains whether abolishing the Britisb monarchy and all lesser titles would need to be replaced with an elected presidential figure, like, for instance, the French

president (wbo also centralises moch of the executive responsibilities in collaboration with a nominee prime minister, a system ometimes described as being in effect an elected monarchy). At stake bere are more than just archaic class titles and feudal remnants. The UK. with an unwritten constitution, was the first to introduce parliamentary democracy and clearly separate the function of bead of state from that of head of government. Without a strong sense of centralised national culture, as, for instance in France, one should ask what type of institutional arrangement would eventually bold Britain together under a republican regime. These are the real questions to ask in a country which has

long combined the preservation of old traditions. social titles and protocols, with a pragmatic sense of

innovation. As attested by Mr Prowse, maybe there is a greater English propensity to criticise the idea and manifestation of social classes in every day life as opposed to a more abstract ideological focus in French intellectual and political life. This could also denote maybe the influence of Anglo-Saxon individualism whenever social affiliations come to be perceived less as an instrument of self-advancement but instead as an obstacle to it.

Anthony Mayer, 308 West 103rd Street. New York, NY 10025, US

## Doubtful value of nuclear fusion research

From Mr Clive Bates. Sir. Research into nuclear fusion is exciting ("Jet gets off the ground", May 8), but is it useful? Outside the nuclear world, it is difficult to imagine a parallel for spending £3.9bn for an experimental reactor on top of the billions spent over the last 17 years, to produce half an hour of sustained heat 10 years from now. The one working fusion

reactor, the sun, delivers to earth more energy than human-kind could ever use. A sustainable energy economy will eventually be based on solar energy embodied in light, wind, waves and crops. In transition we will learn to use energy much more efficiently and make careful use of scarce natural gas in comhined beat and power plants. These developments will be

challenging, but they have three advantages over nuclear fusion: they work: they are available now and their costs are at least within sight of current market prices.

Clive Bates. programme manager International Institute for Energy Conservation. 1-2 Purley Place. London N1 1QA, UK

## William Morris not hostile to manufacturing industry

From Mr James Joll. Sir, It is a tribute in itself to William Morris's reputation that the exhibition marking

development, as you allege, of great deal to his commitment a culture in the UK bostile to to understanding the design manufacturing industry from process, recreating forgotten techniques and creating the 19th century on.

machinery at its Merton Abbey works. Finally, you should not forget that no lesser anthority than Sir Nikolaus Pevsper identified Morris as one of the pioneers of the modern movement,

# Safety first in the skies

Europe needs a single authority to set air safety standards and monitor them

Five years ago, there was much talk about the imminent development of a bandful of global airlines and of liberalisation of the industry that would allow such airlines to operate around the world. In fact, air travel over most of the globe is still regulated hy bilateral agreements and the only significant strides towards liberalisation have been taken by the European Union. The European Commission has, in recent years, been the agent of liberalisation and deregulation on a scale never hefore seen in international aviation. Today, British Airways com-petes in the German and French markets through Deutsche BA and TAT, the French regional carrier. Virgin is acquiring a controlling share of Euro Belgian, which is already offering low-cost competition on six routes out of Brussels. In Italy, Alitalia faces not he adequate in the new sinhead-to-bead competition on gle aviation market. Maintenance, licensing and opara-

several routea - including Milan-Rome, the busiest, where Air One uses the same airport tional requirements must be at both ends. be on anything like a fair It is clear that the old order basis. But it is proving a under which national flag-car-riers carved up Europe'a akies is cracking. With complete liblengthy and frustrating businesa to reach consensus on matters such as flight-time lim-itations in the traditional JAA eralisation next year, there will he further opportunities for efficient airlines - and for passengers who will benefit from greater competition. A lot of us have been critical would bave given the organisaof the Commission's decisions tion legal status and introto allow state aid to nabonal duced a form of qualified

that the Commission cannot force the French or Spanish governments to put their flagcarriers into liquidation. But it is widely felt more could have been done, and faster, to drive out state subsidies - the challenge by British Airways and others to the Commission in the European Court seems well-justified. There is no deny-ing, however, that overall the Commission's achievements in aviation have been impressiva. However, there is a danger of petrification – and new initia-tives will need to be agreed by governments if the single market is to achieve its potential. One such area is safety regulation, where a particularly serious situation is developing. Throughout the 1970s and 1980s, the countries of Europe made steady progress towards harmonisation on safety stan-dards through the Joint Aviation Authorities (JAA). With much hard work and persistence, experts hammered out common airworthiness requirements, working together infor-mally and reaching agreements by consensus. But over recent years, it has become clear that the JAA will

and a second second

airlines, which remains an majority voting. But this is impediment to fair competi-tion. The political realities are now stalled. with deadlock over the issue of the relationship between the JAA and EU institutions. Germany argues that the Commission is required to supervise aviation safety and cannot be left out of the process.

with sole responsibility for cer-A further complication is the attitude of the US Federal Avi-ation Authority (FAA) which tifying and validating all air-craft. Most safety experte-believe that a single body is needed to deal with airworthi-ness and other safety requirehas become increasingly scep-tical about the JAA's ability to deliver common standards ments, such as operations and across Europe. maintainence. There is concern that the expertise assembled and developed by the JAA should not be lost.

Unlike its European counterparts, the FAA has a duty to assist its country's exports. This has led it to encourage McDonnell Douglas to approach individual European safety authorities for certifica-tioo for its new MD900 hellcop-ter. The JAA has refused until some technical issues have been resolved. There is apparently a German purchaser wishing to huy the helicopter, and a possibility that the German safety regulator might certify it unilaterally.

as agreements are reached. And it should have the capac-ity to enforce consistency in There is, therefore, a danger that the harmonisation agreements of 20 years will begin to implementation by national unravel. Yet it would be hopesafety authorities. The new body should also be

There is a danger that the

## FINANCIAL TIMES

Number One Southwark Bridge, London SE1 9HL Tel: +44 171-873 3000 Telex: 922186 Fax: +44 171-407 5700 Monday May 13 1996

# Recovery path at Lloyd's

waters. There is a real prospect that the insurance market's troubles are at last about to be resolved. Enough of its investors resolved. Enough of its investors – the Names – appear willing to back a revised recovery plan, as announced on Friday, to offer it a good chance of success. If the plan works, Lloyd's will be able to start planning for a market free from the ahadow of litigation and without a question mark over its future solvency.

96

÷

By the end of August, Lloyd's hopes to have collected sufficient funds from Names to finance Equitas, the reinsurance company which plans to take responsibility for billions of pounds of mainly US liabilities outstanding on insurance policies sold before 1993. To help meet the cost of Equitas, to end litigation and to help Names meet their debts, Lloyd's has assembled a settlement offer worth £3.1hn.

There are still some remaining obstacles, most seriously in the US where Lloyd's is fighting a series of legal actions being conducted hy state securities regulators. However a deal struck in California late last week, along with other standstill agreements, could be a harbinger of better

news from the US as well. Some Names are still complaining about the size of the contributions from other market constituents. But it is hard to see how Lloyd's might find substantial additional sums of money. The timetable for the recovery plan is already running dangerously close to Angust 31 and the solvency test set by the Department of Trade and Industry. To postpone this test would leave the government open to accusations of allowing political expediency to overrule responsibilities towards policyholders.

#### Structures

ş.

Б÷ Ж

н

1

.....

So Names appear to be falling into line on the sensible assumption that what is now on the table really does amount to a final offer. in that case, Lloyd's will have to start getting to grips with some hig questions about its future market structures.

First, there is the issue of regulation. Lloyd's has tried to sepa-

Lloyd's of London is entering new rate its regulatory department from the rest of the organisation. But after the troubles of recent years, only independent supervi sion would restore confidence. This would need legislation.

Second, the administration and management of the market is bureaucratic and costly. It is run hy a council which includes representatives of all sections of the Lloyd's community. That makes it hard to decide on overall strategy. and strengthens the case for an overhaul of legislation relating to Lloyd's.

Third, management time bas been devoted to sbort-term sur-vival, rather than to streamlining processes and trimming expenses. Too few services are contracted out. Not enough attention has been paid to the benefits of infor-mation technology. Lloyd's has to become more efficient in order to compete with low-cost reinsurance providers in Bermuda and highly capitalised rivals in Zurich and

#### Syndicates

Germany.

Next, there are questions about the appropriate capital hase, Lloyd's needs to remain a substantial size to be a serious player, but it also has to be careful to avoid excess capacity. Lloyd's needs to ask itself

whether it is sensible to continne raising much of its capital annu ally - as favoured hy Names who like to switch into and out of syndicates. It has to keep Names on board if it is to have sufficient capacity to win the best husiness. But underwriters have to plan over a longer term. The injection of £1.5bn of corporate capital in the last three years has been helpful, introducing professional standards, but Lloyd's cannot afford to rely too heavily on investors who are by necessity cautious. The selling point of the market, after

all, is that it is a place where you can insure the uninsurable.

If the recovery plan succeeds In getting rid of most of the litigation and other problems of the past, there is real scope for rebuilding Lloyd's position in the insurance world. But there will still be much to do to cut costs and ensure the right balance between entrepreneurial flair and proper regula-

# The dawning of a new era

India's regional parties are the true winners of the election and the balance of power may be altered forever, argues Mark Nicholson

ow that the votes of hundreds of millions of Indians have been cast and counted in one of the fairest and least violent general elections since india's independence, and the hig-gest ballot in history, the awkward husiness of governing the world's second most populous country can resume.

Not quite at once, india's 11th election, the higgest democratic bal-lot in history, was subdued by tight curbs on campaign spending and was devoid of either compelling national issues or dominant personalities. It has returned a fragmented and complex permutation of parties. None of India's main political groups enjoys a governing margin. The Hindu nationalist Bharatiya Janata Party and allies won 181 seats, on latest count, Congress and Its close allies 136, the "social jus-tice" National Front-Left Front comhine 98. And fully 99 of the next Lok Sabha parliament's 545 MPs represent a raft of smaller partles, mostly regional or caste-based.

Never in india's recent history have so many political leaders gath-ered in Delhi, each carrying a chance of emerging as india's next prime minister.

This may turn out to be Mr Atal Behari Vajpayee, leader of the BJP which emerged as biggest party. Or it could be Mr V.P. Singh or Mr

BJP front.

electorate has voted for the castes and parties of the regions in droves. A host of parties representing "low" and "backward" castes, and populist movements from states across the union, were this election's real winners. The 20 or more such organisations received a large 11 per cent swing in their favour, and now account for almost 40 per cent of the Indian vote, although that still means only some 70 seats in the new parliament.

No government can be formed or survive without their support. And these new regional parties recognisa their power and the implicit ahift in Indian politics it represents. It is one which may forever alter the balance of political power between the centre and the states. As state-based political barons press their cases with new vigour at the centre, it will affect both the direction of economic policy and the allocation of national resources. "They are certainly going to test to the extreme the widespread view that there is an overall 'consensus' about the economic reforms," said a western economist.

These regional barons' quest to impose their interests has begun immediately. The leaders of the four biggest regional groupings, the Telugu Desam Party (Naidu) from Andhra Pradesh, the Dravida Munnetra Kazhagam, which swept Tamil Nadu in league with Conan "occupational hazard of poli-

chialism runs deeper still. The NF-LF, for example, is a coalition of essentially regional parties with narrowly localised support. The Communist Party of India (Marxist) draws almost all its national MPs from West Bengal. Most MPs of the Janata Dal, the other chief compo-nent of the Front, were elected in either Bihar or Karnataka. Even the BJP's support, so far, is concentrated in six west and north Indian states. Only Congress, after this election, cannot point to a natural regional base. Its 30 per cent share of the vote is spread thinly across the union and it rules only two of india's 15 biggest state legislatures. In part the "return of federalism" is a gradual but increasingly assertive reaction to the heavy-handed rule of the Congress party. Many analysis argue that under Mrs indira Gandhi it distorted the true federalism written into India's constitution by seeking to keep the states

under its firm control. Congress' misreading of regional politics partly cost it the election. The decision of Mr P. V. Narasimha Rao, party leader, to ally with the deeply unpopular AIADMK party in Tamil Nadu led local Congress MPs to defect en masse in protest and ally with the rival DMK. They swept the state, and deprived Congress of 37 seats. Party officials describe misreading Tamil Nadu as

tics", but Congress has in the past

few years been making a dangerous

habit of misreading political trends,

Another misreading which has

cost it support is the party's inabil-

ity to harness the rising political "awakening" of india's lower and

or failing to accommodate them.

middle-ranking castes, losing out to new caste-based parties which have sucked away Congress support in Uttar Pradesh and Bihar, where the party has been eviscerated, and in this election in Madhya Pradesh. Punjah and Maharashtra.

These lower caste parties, too. have increased their footholds at the centre. The Bahujan Samaj Party representing Dalits - once "untouchables" - won 11 seats this time from just two in 1991. The "backward caste" Samajwadi Party won 14, against four in 1991. Together with the regional groups, these parties too are likely to press for political and economic policy realignments at the centre.

The effect of this splintering of the political firmament on the economic policies of the next government is only clear in outline. It will depend critically upon whether the next government is a BJP-dominated coalition, or one somehow cobbled out of the NF-LF, perhaps Congress and others.

The populism of most regional groups and the very nature of the lower-caste parties inclines them towards india's poorest, its rural population rather than urban indians (only a quarter of indians live in cities), and farmers rather than industrialists. "There will be immediate pressure to increase resource allocations from the centre

and social welfare," said Mr Ram.

industry liberalising reforms. "There could be pressure on the fiscal deficit straightaway." said one, concerned western economist.

Foreign investors, direct or portfolio, might also pause, depending upon the eventual political configuration. The markets would prefer a BJP government, despite the party's reservations about some forms of foreign investment, since the party has far more clearly delineated freemarket, trade and industrially minded policles. An NF-LF, regionally-backed combine would give greater cause for concern, even if Congress somehow underwrote it, And whatever coalition results,

its politically variegated nature will raise substantial risks of instability. Few veteran Indian pundits give the next government much chance of surviving a year to 18 months. Pessimists give it six months,

Other anxieties include those of the "secnlar, democratic" parties, like the NF-LF and some regional groups, that a possible BJP-led gov-ernment might prove religiously "divisive" and upset the social peace between Hindus and india's more than 110m Moslems - this is the greatest binding agent for these parties' own coalition attempts.

Hopes for the next government might be highest among the poor. lower castes and regions which are now more strongly represented at

## Nation-states of Europe

tion.

nial affair. It is a state visit, which means he comes as head of state, and guest of the Qneen, rather than as political leader. in a foorday programme, only two hours on Wednesday morning are set aside for talks with John Major. It is not to be expected, therefore, that spectacular progress will be made on the many issues that the UK and France have to discuss, from beef to Bosnia. No douht thay will discuss these issues, notably the reform of the Nato, the role of the Western European Union, and the need to avoid again being laft alone in Bosnia if US troops withdraw at the end of the year. But for that kind of husiness, this week's meeting will be only one among many. But Mr Chirac is a political leader as well as head of state. That he should want to spend four days in this way, and that he should be invited to do so only one year into his presidential mandate, constitutes a significant political gesture made by Britain and France towards each other. Ceremony in this instance is heavily charged with symbolism. Mr Chirac and Mr Major like each other. They are fully aware of the many issues which divide them, and of their countrymen's capacity to get on each other's nerves. But they also recognise a number of things which Britain and France have in common: things which have often made them rivals, but also give them common interests, both in Europe and in the wider world.

They are hoth historic nation states (even if the UK sometimes blurs the issue hy claiming to comprise four separate nations). Indeed, France and England have some claim to be considered the twin prototypes of a political model now universally imitated.

#### Geography

They are both maritime powers, situated at the seaward end of the European peninsula. That geogra-phy has given them a history of overseas expansion which has an enduring legacy. Both maintain links with former colonies scattered around the globe. Both states have a more or less

Jacques Chirac's visit to Britain this week will be a largely ceremo-take pride. Both emerged on the winning side from the two world wars of this century. That enabled both to claim a seat alongside the superpowers at the top table of the post-war world order, as permanent members of the UN security council. Both continue instinc tively to measure power in mili-tary terms. They are proud of their armed forces, and ready to use them, if necessary, far from home. They have also acquired nuclear weapons. Their horizons are global, not confined to their immediate neighbourhood.

Relations

in all those respects Britain and France are more like each other than like most other European states; and in particular they are unlike Germany. Both are commit ted to maintaining good relations with present-day Germany, and they are not above competing for German support on occasion. But they feel more relaxed about each other than they do about Germany; and they share an interest in preserving their sovereignty and freedom of action even while co-operating in the EU, whereas Germans often give the impression of fearing their own freedom of action, and wishing as far as possible to pool their sovereignty in a federal Europe.

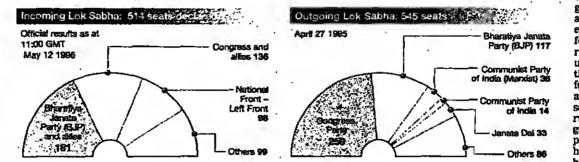

All that is true, hut it boils down to saying that France and Britain are atatus quo powers, with an interest in preserving what they can of an old order. That is hardly an adequate basis

on which to plan the future. Moreover, there is a profound asymmetry. France has a common frontier with Germany, and an experience of defeat and occupation which Britain does not share Managing the relationship with Germany, and the affairs of the continent, has to be the first priority for France.

That is why even Mr Chirac whose pragmatic nationalism made him at first sight the ideal French partner for Mr Major, soon disappointed any British hopes that he would scrap the plan for a single European currency. France and Britain may be allies in many small things. On the one big thing they remain far apart.

gress party defectors, and two Jyoti Basu of the National Front-Left Front alliance which this weeksmaller Assam and Punjab parties end was struggling to unite itself met yesterday to hammer out a behind an agreed leader while also courting the smaller parties. #### Little and large

John Major seems for once to have been able to entertain a welcome guest from Germany, in the shape of the outspoken prime minister of Bavaria, Edmund Stoiber, who recently popped across to the UK. Once nicknamed "Edmund

Thatcher" by the German weekly newspaper Die Zeit (for his Euro-sceptical views). Stoiber is a firm believer in maintaining national identity, and in keeping strict curbs on the powers of the Brussels hureaucracy. "Give them a finger, and they will take your whole hand off," he

said during his visit - a phrase which could have come from certain members of Britain's Tory party. Premier of a staunchly

independent state, Stoiber is fiercely opposed to anything that smacks of a federal European Union. He is also a great believer in "subsidiarity", that awful Euro-concept Major admires, which means that, wherever possible, jobs should be done locally, not in Brussels

The only trouble is, Major means keep the power in London. Stoiber

# Bulgaria plans shutdown of state enterprises in bid for IMF aid

#### By Theodore Troey in Sofla

Bulgaria is expected to announce today the closure of dozens of lossmaking state enterprises, throwing thousands out of work, in a bid to reach agreement with the International Monetary Fund on a support package to defuse

the current economic crisis. Along with the closures which include coal mines, refi-neries, power stations and shipyards - the government will list enterprises to be restructured, likely to include Balkan Airways and the state railway company. Officials will be sent to the enterprises concerned to prevent looting of assets The announcement comes at

the start of a crucial week for Bulgaria, after the central bank on Friday raised its main interest bank fixing rate of 122.56. on Friday raised its main interest rate to a record 108 per cent from 67 per cent to halt the steep

decline in the value of the lev, the national currency. The currency crisis was triggered by concern about Bulgar-ia's ability to meet a heavy foreign deht repayment schedule. Over the weekend, government and central bank officials axpressed confidence that an

agreement with the IMF on a new standby arrangement could be reached this week. An IMF mission is currently in Sofia. Their confidence, coupled with the record interest rates.

appeared to stahilise the lev,

However, many shops were ref-

using to accept the lev in payment for non-perishable goods, insisting on US dollars. Analysts warned of the economic danger in the current level of interest rates. "This will freeze

all investments," said Mr Emil Harsev, a former deputy governor of the central bank. If the crisis continues when markets reopen today, the central bank is not expected to be

able to intervene strongly to support the lev as its foreign exchange reserves have shrunk to \$650m hy the end of April from \$1.3bn at the end of 1995.

Foreign bankers fear that, without IMF support, Bulgaria may fail to service debt payments of \$1.2hn this year. But a deal will need an indication of the government's will for reforms. Earlier talks with the IMF col-

lapsed because the government could not push through the closure of the lossmaking state enterprises and a restructuring of the state-owned banks. Critics cast doubt on whether

the government's actions would restore confidence in reforms. "Confidence in state institutions is crumhling hefore our eyes, said Mr Garabed Minasian a leading Bulgarian economist. We do not trust our banks, our police or the statistics."

The two-year-old legal battle between Procter & Gamble and Bankers Trust over derivatives contracts has been settled out of court. In the meantime, the market has adapted to a new type of risk: the legal risk of being sued for selling clients instruments they do not fully understand or which are inappropriate to their needs.

At the time, P&G's legal action shocked the derivatives industry. As in the securities markets, the overriding attitude towards professional clients was coreat emptor. Logically or not, it is now accepted that derivatives are different because of their complexity. Documentation has become much more precise. detailing not only the terms of the agreement but potential changes in valuations.

At its worst, innovation in the derivatives market was more about finding a way of gaining fatter margins than providing clients with useful instruments. After a slump, volumes have revived, but clients are sticking to plainer instruments. Even hedge funds, badly burnt by the bond market collapse of 1994, bave lost some of their appetite for leveraged risk. The result is that margins for oanks have thinned. The fee for e currency option with a face value of SIm appears to bare stabilised at around \$500 compared with \$1,000 a few years ago.

So it is more or less a happy ending, with pushers and victims reaching some sort of accommodation. The exception is Bankers Trust, which bore the brunt of criticism and saw profits slump as a result. It still has to find a new identity: most imaginative inventor of derivative instruments is no longer a desirable label.

#### Spanish privatisations

The fanfare over the Spanish government's announcement of Pta200bn (\$1,58bn) of hudget cuts on Friday drowned out its equally significant commitment to raise much more through privatisations. Government's stakes in five listed companies -Argentaria, Endesa, Repsol, Tabacalera and Telefonica - are worth around Pta2, 100hn, and there are many more unlisted companies. Mr Josep Pique, industry minister, rightly wants to liquidate the state industrial holding company Teneo. Given the recent rally in Spain's financial markets, he has the perfect opportunity to make a start.

The previous socialist government was not averse to privatisations, but disposals were marred by confused execution, in timing and size of issues. There was also an unhealthy penchant for noyaux durs - cozy groups of

Risky business

ne solver til sen

long-term shareholders, which protect management from the rigours of shareholder discipline. The new gov-ernment should stand by its criticisms of such methods, if it wants to maximise revenues - and this should be a priority, given Spain's commitment to joining a single European currency. The most sensible approach for the

government would be to sell out of Repsol, the oil group, and reduce its investment in the state utility Endesa this year. A sale of telecoms giant, Telefonica, should be postponed, since the company offers considerable scope for rationalisation, and there is a surfeit of alternative telecoms offerings. But an attractive alternative would be a trade sale of Argentaria. By offering a slice of the Spanish banking market to all-comers, the government would get an excellent price - and revitalise the banking sector at the same time.

UK pre-emption rights Do pre-emption rights inflate the

cost of capital or keep it low? Most institutional investors think the latter. fronically, given the controversy over the high cost of underwriting, their case rests on the level of fees. Though the 2 per cent commission typical in rights issues may be considered excessive, the institutions say, it is still less than half the rate US companies pay in bookbuilding exercises. Moreover, 1% per cent comes back to investors in sub-underwriting fees, so the actual cost of raising funds is even less.

The fundamental flaw in this argument is that it assumes that fees are the only things that influence the cost of capital. Though US companies pay higher underwriting commissions, their shares are marketed to a broader range of investors: The simple act of casting the net wider cuts the cost of capital - even if existing investors are keen on a stock, there are limits to the proportion of their portfolio they will .arguments all over again.

want to hold in it. An effective mar-keting campaign can further cut the cost of capital by generating enthusiasm. This will only work when companies have an attractive use for the cash; but there is no harm in a system which allocates capital to companies with the best investment cases.....

Clearly, there is a trade-off between fees paid to bankers and the value of reaching a new shareholder base. Where the balance of advantage lies cannot be decided on an a priori basis. Hence, the merit of the Confederation of British Industry's position that companies should have flexibility to decide on a case-by-case basis which method to choose. Investors abould back it rather than staying stuck in the mud.

UK power

"We do companies no favours in the long run, "Britain's trade secretary Mr Ian Lang said last week, "by allowing them the luxury of protection from competition at home." Nor, he might have added, by protecting them from takeovers. Still, Mr Lang will some have a chance to put his new pro-competition policy into practice - when he is asked to clear National Powers forced sale of power stations to Hanson's Eastern Group. The deal is designed to increase competition in generation; the question is whether it. is enough.

There are two reasons for doubt." First, both PowerGen and National Power want their forced sales to go to Eastern. The result will be only three real competitors at times that matter when electricity demand is high Three bidders is better than two, but not much.

Second, the generators have conve niently struck deals which curh Eastern's incentive to hid prices down, by linking payments to the amount of power it sells. This increases Eastern's marginal costs; as a result, it is unlikely to undercut the generators as aggressively as if it had paid for the power stations up front.

The right answer would be another Monopolies and Mergers Commission inquiry, looking harder at competition in power generation; until this problem is properly cracked, the sector will continue to be plagued by regulatory gamesmanship. Of course, an inquiry could upset the government's nuclear privatisation, so the odds are against one. Nonetheless, it is depressingly a likely these disposals will not be enough to create a truly competitive market. If so, the generators had better be prepared to endure the same

A DIVISION OF SWISS BANK CORPORATION

### **Brussels faces embarrassment** over reduced growth forecasts and Exchange Commission, the federal securities regulator, which suggested, contrary to past

practice, that US Names should By Gillian Tett in London be able to have grievances heard in US rather than UK courts.

The European Commission will face fresh embarrassment this week over preparations for a single currency when it cuts its forecasts for growth in member states

Weaker-than-expected growth has fnelled Commission fears that Germany and France will fail to meet hudget deficit criteria for economic and monetary union

Under the Maastricht treaty, states wanting to join a single currency in 1999 must reduce their hudget deficits helow 3 per cent of gross domestic product in

1997 Any forecast that Germany and France will fail to meet this target will prove highly embarrassing for Mr Yves-Thibault de Silguy, European monetary affairs commissioner. In meetings with British officials in London last week he insisted the 3 per cent deht target remained "fully realistic and achievable".

Some observers suspect the Commission will now shy away from explicitly stating that

the broader economic slowdown French and German deficits will in Europe

be more than 3 per cent of GDP. The Commission denies its forecasts are politically massaged. But financial markets are likely to greet with deep scepti-cism any projection showing Ger-many and France on course to meet the deficit criteria. "People will smell a rat - they

just won't believe it," Mr Keith Skeoch, chief economist at stockbroker HSBC James Capel, said. The Commission's last halfyearly outlook in November forecast growth in Europe this year at 2.6 per cent. This should enable France and Germany to meet the deficit target.

Mr de Silguy admitted last week that growth would be markedly less than 2 per cent. Commission officials are still thrashing out the final details of the growth and deficit forecasts, to be presented on Wednesday. But some helieve the forecast for growth will be nearer 1 per cent. The Organisation for Economic Co-operation and Development

has already forecast that France and Germany will fail to meet the deficit criteria as a result of

Figures drawn up for the OECD ministerial meeting next

week show that the German and French deficits will be significantly higher than 3 per cent next year. although the OECD has faced pressure to amend these to reflect the recent Ger-

man budget cuts. Some economists, like Mr Skeoch, believe these forecasts will trigger a wave of scepticism about Emu. Others, such as Mr Patrick Artus, chief economist of the French group Caisse des Dépôts, insist the political momentum hehind monetary union simply means the deficit

criteria will be relaxed. Commission officials helieve the impact of softening the treaty terms might he lessened if a greater focus was placed on the convergence process after monetary union starts. The Commis sion wants to create an "early warning" system that would encourage countries to keep cutting budget deficits under Emu.

Zeroual aims to end Algerian fighting by Routa Khalat in Algiers

Mr Liamine Zeroval, the Algerian

the country's 48 wilayas (prov- as few as 15 members, and wide- party rule or only lead it towards inces) before they could contest spread dissatisfaction with the a more managed democracy. ld be under regime allowed an Islamic party.

of 800 members in a majority of democratic. Parties emerged with country back to pre-1989 one-Some analysts sug

plan to end four years of violent stroggle with Islamic militants.

His proposals inclode amending the constitution to har Algerian parties from using religion or ethnicity for political ends, establishing a second chamber of parliament with appointed national figures and limiting any president to two five-year terms.

There has been no elected parliament since 1992, although a lower house continues to exist under the constitution.

Mr Zeroual's programme says political parties should renounce violence and have at least one founder-member and a minimum

proportional representation. The parties were asked to respond within two weeks. A national conference on the proposals is planned for summer, and legislative elections scheduled in the first quarter of 1997. Mr Zeroual won a landslide vic-

tory in presidential elections last November, and in April held a first round of consultations with political leaders. After Algerians took to the

streets in 1968 to demand democratic freedom and economic reform, Mr Chadli Bendjedid, then president, opened up the political system to make it more

the Islamic Salvation Front (FIS), to win the first round of legislative elections in 1991.

The army stepped in and can-celled the second round of elections and the FIS was outlawed. provoking a struggle in which about 40,000 people have died. Mr Zeroual seems to have little intention of allowing the FIS to contest elections. Outlawing religious parties will present problems, however, since he allowed one, Hamas, to contest last year's

plan was simply a basis for discussions with political leaders. Mr Ronald Newmann, US ambassador to Algeria, said yes-terday that the US was encourag-

ing a level of openness "We are not saying that you have to reach 100 per cent democracy, hut yon cannot get to stability through repression and without a political solution. This is what the Algerian government says it is going to do, and they will have a real opportunity to show this hy the way they react to what the parties tell them

Yesterday, some political leaders were doubtful whether Mr about the memorandum." Mr Zeroual intended to bring the Newmann said.

FT WEATHER GUIDE

presidential elections.

**Europe today** 

Much of western Europe will be dry and fair but temperatures will be low. Readings higher than 20C will only be found in southern France, in Spain and Portugal and in southern Scandinavia as warmer air from the east crosses the Baltic Sea. Central Europe and the eastern Mediterranean will be unsettled. Showers will be numerous. some with thunder, and temperatures will stay below normal, especially across Italy. The highest temperatures will be found around the Black Sea and over southern Russia where values will reach 30C in Diaces.

#### **Five-day forecast**

A warming trend will improve conditions over Italy and Greece but Spain and Portugal will have an increased risk of showers as the week progresses. Northwest Europe will stay mainly dry for the first half of the week. More cool air from the north will cross the North See countries during the second half of the week. The porthern Ains are likely to have a lot of rain during the next couple of days.
